(*) Currency translation differences

Revaluation of Ukrainian hryvnia in the first half 2023 had impact on assets and liabilities of the Consolidated Financial Statements.

The negative impact of currency translation differences for the first half 2023 amounts to **€170k** and is composed of:

€ 20 k gain due to translation difference on current year net loss arising from the difference between average (or daily) and closing rate (39,52 UAH/ EURO and 40,0 UAH/EURO respectively).

€ 190 k loss due to translating the opening net assets at a closing rate (40,0 UAH/EURO) that differs from the previous closing rate (38,95 UAH/EURO): the loss is due to the fact that net assets of Ukrainian entities are positive.

(**) Revaluation surplus on fixed assets disposed in first half 2023.

Consolidated cash flow statement

(in thousands of Euros)	Note	first half 2023	first half 2022
Profit / (loss) for the period		**(5 780)**	**(27 192)**

** In the consolidated balance sheet, the accounts receivable as of June, 30 2023 include prepayments made to suppliers of the Group in connection with inputs for the 2023 harvest. In the consolidated cash flow statement, the variation in prepayments to suppliers (positive cash flow / decrease in receivable), which stands at € 89k, not inclusive of exchange rate effects, is presented as a change in accounts payable.*

*** In the consolidated balance sheet, the accounts payable as of June, 30 2023 include prepayments received from Group customers in respect of upcoming deliveries in the end of financial year 2023. In the consolidated cash flow statement, the change in customer prepayments (negative cash flow / decrease in debt), which amounts to € 136k, not inclusive of exchange rate effects, is presented as a change in accounts receivable.*

Notes to the Consolidated Financial Statements

The Interim Condensed Consolidated Financial Statements of the AgroGeneration Group ("AgroGeneration", "the Group" or "the Company") for the six months ended June 30, 2023 were authorized for issue by the Board of Directors on November 27, 2023. These Financial Statements are presented in thousands of euro for all financial years, except for the per-share information.

1. Scope of consolidation

The Group's Interim Consolidated Financial Statements for the six months ended June 30, 2023 include the accounts of AgroGeneration SA and of all companies controlled by the Group, as well as companies over which the Group exercises significant influence. Please refer to the Note 27 for the List of consolidated companies.

General information and background

AgroGeneration was created in March 2007. The parent company is a Joint Stock Company (AgroGeneration SA) recorded on the Paris Trade and Companies Register with number 494 765 951, whose shares have been listed on the Alternext market of NYSE-Euronext Paris since March 1, 2010.

The registered office address is 19 boulevard Malesherbes, 75008 Paris.

2. Major events of the period

2.1. Military invasion of Ukraine and Going concern risks

On 24 February 2022, Russian Federation launched a full-scale military invasion of Ukraine, followed by intense military actions unfolded in a number of regions of the country, mainly in the East and in the South of Ukraine. As of the date of this interim consolidated financial statements publication, the war is ongoing causing further damages to the entire economy of the Ukraine and to its separate industries, including agriculture. According to the latest available estimates, total value of damages to the Ukrainian agricultural sector due to war amounts to over $40.0 billion, out of which $8.7 billion are direct losses of the sector. The most of direct losses ($4.7 billion) were caused by stolen, destroyed and damaged agricultural machinery and equipment. It should be noted that some equipment was lost due to explosions during field work (two such cases took place within AgroGeneration farms in 2022 and 2023).

Ukraine. Agriculture. The Amount of Direct Losses in the Sector *(as of early May 2023)*

	B USD	Details
Machinery and equipment	4.7	109.6k units of agricultural machinery were damaged or destroyed (tractors, seeders, harrows, etc.)
Finished agricultural produce	1.9	more than 4M tons
Storage capacities	1.3	almost 8M tons of simultaneous storage capacity was temporarily lost
Other losses	0.8	
Total Estimated Direct Losses	**8.7**	

Source: KSE Institute

In addition to the direct losses, there are also indirect losses (e.g., reduced production, disruption of exports, increased production costs, land damage and the need for reclamation, etc.), which are currently estimated at $31.5 billion. In this category, the main losses are associated with a decrease in crop production, which is almost half of all indirect losses ($14.3 billion). In addition, the loss of irrigation from the Kakhovka reservoir (the Kakhovka dam was blown up and destroyed in early June 2023) led to indirect losses of crop production revenues of up to $182 million per year.

It is also difficult to assess the consequences of contamination of agricultural land with explosive objects, destruction of the upper layers of soil due to "landings" and explosions during demining. According to the Ukrainian government latest available estimates, around 174,000 km^2 of Ukrainian land (around 30% of total country's land area) are potentially contaminated with explosives. Thus, mine clearance is one of the biggest challenges for farmers doing business in the liberated territories of Ukraine. The authorities of the Kharkiv region, where all AgroGeneration's production assets are located, reported that as of July 2023, about 570,000 hectares of farmland remained mined.

In 2023, apart from the losses and damages, the Ukrainian agricultural sector continues to suffer from a number of other limitations and issues caused by the full-scale war, in particular:

- The closure of the grain corridor: traditionally, Ukraine shipped grain around the world from its Black Sea ports. Russia initially blocked this route after the invasion in February 2022, but a safe corridor agreement brokered by the United Nations and Turkey in late July 2022 allowed exports to resume.

However, in a year, in mid-July 2023, Russia withdrew from the agreement. Since then, it has stepped up attacks on Ukraine's grain infrastructure, including attacks on key Danube River ports.

- The shelling of port infrastructure.
- The embargo on exports of certain agricultural products by five neighboring countries: on May 2nd, 2023, the EU imposed temporary import restrictions and allowed Poland, Bulgaria, Hungary, Romania, and Slovakia to ban domestic sales of Ukrainian wheat, corn, rapeseed, and sunflower. Although the ban expired on September 15th, 2023, negotiations to ease the trade restrictions with the mentioned countries are still ongoing.
- Rising fuel, fertilizer and chemicals prices: according to the available estimates, in the fall of 2023, fertilizer application is expected to be on average half the level of agronomic needs, and plant protection products are expected to be 56% of the needs in Ukraine. Many of Ukrainian agricultural producers have abandoned original chemicals and switched to cheaper generics, which are less effective in fighting pests and diseases.
- High logistics costs and low crop prices: limited export opportunities in Ukraine, now centered on small ports on the Danube River and rail to Eastern Europe, have increased the logistics component and consequently reduced the prices traders can offer farmers. The closure of seaports has also led to a sharp increase in the prices of imported fuel, seeds, fertilizers, and spare parts for agricultural machinery.

AgroGeneration, which production assets are located in the close proximity to the theater of military activities, also suffered a significant negative impact from hostilities and temporary occupation by Russian troops which amounted to over €15 million (including lost crops, damaged machinery and infrastructure, inventories, etc.) and was recognized in 2022 consolidated financial statements, followed by conducted operational restructuring and partial liquidation of the Group's assets (Note 5 of the annual consolidated financial statements for 2022).

Despite the existing challenges, in 2023, the Company continued to do everything possible to ensure the smooth operation of all the Group's farms within its current scope and to provide continuity to the Group's activities, namely:

- The Company managed to conduct the spring sowing campaign in April-May 2023 and to complete winter wheat harvesting in July-early August. As of the date of these interim consolidated financial statements publication, the Group has almost completed late crops harvesting campaign. The Group's farms were fully supplied with the necessary materials for field work within the year. While achieved winter wheat performance improved in 2023 compared to 2022, sunflower yield appeared to be slightly lower. The operating land bank of the Company remained unchanged during the year and equaled 30,000 ha.
- As of the date of these consolidated financial results publication, the Group has already started the 2024 crop season. In mid-August 2023, in parallel with late crops harvesting, AgroGeneration started sowing winter crop and preparing the soil for the 2024 harvest. The Group's farms increased the area under winter wheat to up to 50% of the Company's total operating area (compared to c.a. 20% in 2022).
- As of late October 2023, the Group completed sales contracting of its prior year 2022 harvest and was engaged in 2023 crop sales. To the date of these consolidated financial results publication, the

Group has sold around 43% of both winter wheat and sunflower of 2023 harvest. Due to the listed earlier external factors limiting the Group's export potential in the coming marketing season, it is currently expected that most of the Group's 2023 harvest will be sold on the domestic market at lower than planned crop prices.

- In H1 2023, the Company did not attract external banking financing. Thanks to 1.7M USD short-term trading financing from one of the chemicals suppliers negotiated in early 2023 and wise management steps executed towards adaptation of the business activities to the war realities (incl. conducted operational restructuring and partial assets liquidation), the management of the Company was able to cover all operational expenses, including execution of 2023 sowing and harvesting campaigns. As of the date of these interim consolidated financial statements publication, a limited number of banks and trading partners in Ukraine were considering providing external financing to the businesses in the regions close to the combat zone (incl. the Kharkiv region).
- The Group's key personnel and top managers continued working remotely: throughout the first half of 2023, the Company's offices located in Kharkiv and Kyiv continued to experience a high number of air alerts, explosions, and artillery attacks initiated by the Russian side. Despite the passage of time, these incidents did not exhibit a substantial decrease in intensity. On average, there were 2-4 air alerts per day, lasting up to 12 hours in total, thus posing a direct threat to the lives of employees.
- In 2023, the Group continued to provide support to its employees and their families, as well as to the defenders of Ukraine.

The Group has adequate resources to continue its operations within its scope (of c.a. 30,000 hectares) for the foreseeable future. Management acknowledges that future development of military actions and their duration represent a single source of material uncertainty which may cast significant doubt about the Group's ability to continue as a going concern and, therefore, the Group may be unable to sell its assets and discharge its liabilities in the normal course of business. The recoverability of Group's assets, as well as the future operations of the Group, may be significantly affected by the current and future macroeconomic environment. The full extent of the impact of further development of military actions on the Group's business is unknown, but its magnitude might be severe, as the war is ongoing as of the date of these statements publication. Despite the single material uncertainty relating to the war in Ukraine, management is continuing taking actions to minimize the impact on the Group and thus believes that application of the going concern assumption for the preparation of these consolidated financial statements is appropriate.

3. Financial risk management

3.1. Geopolitical risks in Ukraine

The Group conducts most of its operations in Ukraine. The Ukrainian economy while deemed to be of market status continues to display certain characteristics consistent with that of an economy in transition. These

characteristics include, but are not limited to, low levels of liquidity in the capital markets, relatively high level of inflation, and some imbalances in the public finance and international trade.

Until February 2020, the Ukrainian economy was in a robust macroeconomic state thanks to the successful implementation of a reform program, with declining public debt, falling inflation and positive growth forecasts. But the Covid-19 outbreak and associated lockdown measures resulted in an economic downturn with visible negative impact observed by the end of 2020. Ukrainian economy returned back to growth in 2021, overcoming negative implications of COVID-related restrictions. Still, since February 2022, Ukraine is facing another sharp economic and geopolitical downturn on the back of Russian invasion of Ukraine launched on February 24th, 2022 with impacts which cannot be accurately assessed for the moment as the war is ongoing in Ukraine to the date of this publication.

In February 2022, Russian forces commenced a military invasion of Ukraine resulting in a full-scale war across the country. The ongoing military attack has led, and continues to lead, to significant casualties, dislocation of the population, damage to infrastructure and disruption to economic activity in Ukraine. By October 2023, over 6.2 million refugees from Ukraine were recorded globally with more than 5.8 million individual refugees from Ukraine recorded across Europe. According to UN data, the largest number of refugees with the status of temporary protection are currently located in Poland - over 1.6 million people. Around 1.0 million refugees are officially registered in Germany, and around 0.6 million in the Czech Republic. Up to 3.7 million people remained internally displaced in Ukraine to the date.

Russia's military has damaged and destroyed Ukrainian power stations, infrastructure and agriculture, causing billions in damage. Current estimates of direct and indirect losses to Ukraine from Russian aggression in February 2022 range from $564 billion to $600 billion. As of September 2023, the Kyiv School of Economics estimated that the total amount of documented damage to Ukraine’s infrastructure had increased to over $151 billion. Recovery is expected to take at least a decade, and the total cost is estimated to be between $411 billion and $1.1 trillion.

Ukraine. The amount of Direct Losses as a Result of the Russian Invasion *(as of early September 2023)*

	B USD	Details
Housing	55.9	167.2 thousand buildings
Transport infrastructure	36.6	18 airports and civilian airfields; 126 railway stations and train stations; 344 bridges and bridge crossings; more than 25,000 km of state and local highways and municipal roads
Business assets	11.4	at least 426 large and medium-sized private enterprises and state-owned companies
Educational sphere	10.1	up to 3,400 educational institutions were destroyed mostly in the Kharkiv, Donetsk, Chernihiv, Zaporizhzhia and Kyiv regions
Energy sector infrastructure	8.8	of which 683M USD is a direct loss from the flooding of southern Ukraine
Agriculture	8.7	
Social sphere	5.9	incl. science and healthcare facilities, cultural facilities, sports facilities and administrative buildings
Other direct losses	13.8	the estimated cost of the replacing of the destroyed infrastructure
Total Estimated Direct Losses	**151.2**	

Source: KSE Institute

The Ukrainian economy has lost around 30% of GDP in the year following Russia’s invasion in 2022 on the back of almost complete suspension of business activity in March-May last year, fuel crisis, rapid decline in exports (due to the seaports blockade), disruption of logistics chains, shelling of energy infrastructure in the fall and winter. According to the Ministry of Finance of Ukraine, this was the largest loss in economic activity that the country had experienced since its independence in 1991. Despite the continued fighting, the country’s economy has started to stabilize in the first half of 2023. A number of reasons fueled mentioned recovery:

- Ukrainian business and households recovered from the shock of the war faster than expected
- The restoration of electricity supply by spring 2023, as well as the establishment of logistics through land corridors, helped to return the industry and the agricultural sector to normal.
- Consumer price growth slowed dramatically. In addition to the factors mentioned above (recovery of business activity, elimination of the energy deficit), the price situation was favorably affected by cheaper fuel, increased supply of food products (including imported ones) and unchanged utility tariffs. In addition, the National Bank of Ukraine (the NBU) stopped issuing hryvnia, which made a major contribution to the inflationary spiral in 2022.
- Ukraine continued to receive funding from abroad. Since the beginning of war in Ukraine, international organizations (IMF, EBRD, EU, World Bank), along with individual countries and charities, have provided Ukraine with bilateral and concessional financing, donations and material support. According to the estimates, the amount of foreign financing in January-June 2023 amounted to $23.6 billion (around $32 billion were received in 2022).
- The National Bank of Ukraine had enough power to balance the foreign exchange market. Since the beginning of summer 2023, the cash market exchange rate has approached the official rate and has not yet exceeded 38 UAH/$, which allowed the NBU to move to a regime of managed exchange rate flexibility (the official exchange rate will be determined on the basis of the interbank market rate, rather than being set by policy) from October 2023. Managed exchange rate flexibility differs from the floating exchange rate regime that was in place in Ukraine before the outbreak of the full-scale war. Under managed exchange rate flexibility, the NBU will compensate for the structural shortage of foreign currency in the market and significantly smooth out exchange rate changes. On the interbank market, the NBU met demand through interventions, having enough foreign exchange reserves for this purpose, which exceeded $40 billion at the beginning of September 2023.

According to leading world financial institutions (e.g. WB, IMF) latest available estimates, the Ukrainian economy is expected to grow by 2-3% in 2023 (vs. decline by 29.1% in 2022) and by 3-4% in 2024. The International Monetary Fund predicts Ukraine’s government debt to increase to 88.1% of the country’s GDP in 2023 due to the ongoing Russia’s war (vs. 78.5% in 2022 and 48.9% in 2021). According to the Fund's forecasts, in 2024, the public debt will increase to 98.6% of the country's GDP, and by 2025 it will exceed 100% (100.7%) of GDP. The figure for 2025 will be the peak. The country’s budget deficit may reach up to-29.0% (vs.-16.3% in 2022 and -3.4% GDP in 2021). According to the NBU latest forecasts (as of October 2023), inflation rate in Ukraine will decline to 10.6% at the end of 2023 (vs. 26.6% in 2022 and 10.0% in 2021), followed by further reduction to 8.5% in 2024.

All in all, the pace of the Ukrainian economy recovery and its feasibility, however, is subject to a high degree of uncertainty related to the duration and intensity of the war, which is still ongoing. Further economic growth in the country depends upon the resolving the Russia invasion of Ukraine, maintaining the stability of the country's energy infrastructure, further improvement of the situation with the export of Ukrainian products, growth in consumer demand due to improved incomes of the Ukrainian population, maintaining of the international financial support, and upon success of the Ukrainian government in realization of new reforms and recovery strategy (incl. cooperation with the international funds) after stopping the invasion.

The known and estimable effects of the above events on the financial position and performance of the Group in the reporting period have been taken into account in preparing these interim consolidated financial statements. All farming subsidiaries of the Group are located in the Kharkiv oblast of Ukraine, where there is a high risk in the further escalation of military conflict, which is already in place since February 2022. Sowings of the Group in 1H 2023 in Kharkiv oblast represented around 30,000 ha.

Management is monitoring the developments in the current environment and taking actions, where appropriate, to minimize any negative effects to the extent possible. Further adverse developments in the political, macroeconomic and/or international trade conditions may further adversely affect the Group's financial position and performance in a manner not currently determinable.

3.2. Risks related to changes in the legal and fiscal environment

Ukraine currently lacks a comprehensive legal system allowing it to foster and consolidate a stable market economy. Its fundamental laws are relatively recent, little tested, subject to change and often characterised by ambiguity and inconsistency. While the pace of change of Ukraine's legislative framework is fast, several fundamental laws are still in the process of discussion or adoption by the Ukrainian parliament.

Uncertainties also arise due to the fact that different regulatory authorities can choose to reinterpret an applicable law, particularly in the field of taxation, possibly with retroactive effect. Also, the corpus of law relies on implementing decrees which have often not yet been promulgated, creating legal loopholes or else that have been promulgated with substantial differences in relation to the rules and conditions established by the corresponding law, which generates a lack of clarity and many conflicts between companies and the authorities.

No assurance can be given that the legal and fiscal environment in which the Company operates will become more stable in the near future. Insofar as Ukraine is continuing to develop its corpus of law, some existing laws might change and have a negative impact on the Company.

3.3. Risks related to changes in exchange rates

Incomes and expenses of the Group are partly exposed to changes in exchange rates, particularly the euro, the USD and the hryvnia.

Ukraine operations

Starting July 9, 2012 the National Bank of Ukraine (NBU) fixed the exchange rate for USD / hryvnia at the rate of 7,99 hryvnia per 1 USD. On February 6, 2014 this measure was released and NBU stopped supporting the exchange rate of hryvnia. This measure together with the economic situation resulted in a sharp decline of hryvnia foreign exchange rate which reached 15,77 UAH/USD as of the end of 2014. During 2015 –2021 hryvnia continued its decline. From the very beginning of the Russian invasion in early 2022, Ukraine has had a fixed exchange rate, which has been determined by the National Bank's resolutions all along. As of February 24, 2022, it was 29,3 UAH/USD, but within 5 months, due to high inflation, the National Bank had to lower the official exchange rate to 36,57 UAH/USD, which was in place as of June 2023. Since the beginning of summer 2023, the cash market exchange rate has approached the official rate and has not yet exceeded 38 UAH/$, which allowed the NBU to move to a regime of managed exchange rate flexibility (the official exchange rate will be determined on the basis of the interbank market rate, rather than being set by policy) from October 2023.

The devaluation of hryvnia against the euro was in line with EURO/USD exchange rate.

Ukrainian legislation concerning the hryvnia prohibits the use of most of the exchange rate hedging instruments that are available in other countries. Options, futures, forwards, and swaps are not available in hryvnia. Therefore, AgroGeneration does not actively cover its exposure to fluctuations in the hryvnia on financial markets.

The Group is partially naturally hedged against a risk of change in exchange rate of the hryvnia against the USD. Indeed, in the scope of its operations in Ukraine, crop revenues and some of the Group’s costs (seeds, chemicals, pesticides, etc.) are influenced by worldwide commodity market in USD even if denominated in UAH. In case the local price is not automatically adjusted to the international market, the Group has sufficient storage capacity to postpone its sales.

At last, the currency risk in relation to USD denominated liabilities for crop financing is partially mitigated by the existence of USD export sales.

Financial debt

Interest rate risk sensitivity analysis

At June 30, 2023, if interest rates (for both variable-rate and fixed-rate borrowings) at that date had been 10 basis points higher/lower with all other variables held constant, interest expense for the year would have been € 183k higher/lower (December 31, 2022– €177k)).

Foreign currency exchange rate sensitivity analysis

The Group's foreign currency denominated monetary assets and liabilities as of June 30, 2023 consist of US dollar denominated loans and other debts. Other monetary assets and liabilities are not significant.

At June 30, 2023, if the USD had weakened/increased versus EUR by 10 per cent with all other variables held constant, pre-tax profit for the year would have been € 376k higher/lower.

3.4. Risks related to commodities price changes

Due to the size of its grain production, the Group is exposed to fluctuations of crop prices.

For a few years in a row, agricultural markets have been characterized by high volatility of prices, which depend on world prices which are mainly formed on the stock exchanges of agricultural products. The main factors affecting prices are the climatic factors, the level of energy and inputs prices, and the seasonality of demand.

The market for agricultural commodities in Ukraine is subject to fluctuations in agricultural commodity prices on international markets. It is also subject to conditions of Ukraine's local demand and export capacity, especially when export quota policies are set up, as was the case in 2010. Since Ukraine is a member of the WTO, these quotas are intended to be exceptional and of limited duration, justified only by a significant reduction in production on a country-wide scale. To limit this risk, the Group has developed its own storage capacity enabling it to better manage the pace of commercialization of its production.

Crop prices in the H1 2023 continued to be significantly affected by the military invasion of Ukraine by Russian troops launched in February 2022, followed by blockade of the Ukrainian seaports, oversupply of grains within the country, damaged transportation routes and overall paralysis of the Ukrainian supply chain.

3.5. Liquidity risks on crop financing

The main liquidity risk arises from the seasonality of agricultural production. Costs and required working capital reach their peak in spring ahead of the harvest. The cash inflows are concentrated in the second half of the year after harvest. The Group remedies this seasonality by expanding its own storage capacity which allows it to sell its production throughout the year. In addition, the management team controls the liquidity risk by monitoring key performance indicators, including those regarding cash flow.

Companies face significant liquidity problems due to poor sources of foreign investment and low lending capacity by the domestic banking system.

Stable financial position at the end of 2021 enabled the Group to avoid external banking financing in 2022 (the first year of the full-scale war in Ukraine), thus reduced the Group's debt burden. No new banking financing has been attracted by June 30, 2023, since the war factor and location of the Group's farmlands in the Kharkiv region (at the frontline) currently create some limitations in the amounts and sources of the external financing. As of the date of publication of these Financial Statements, the Group continues negotiations with the Ukrainian banks and other potential investors to secure the working capital needs for the next 2024 crop production season.

3.6. Counterparty risks

The Group is exposed to credit risks through its cash and cash equivalents, which are kept in current accounts and with financial institutions (local banks), its supplier credit and customer credit, which includes commitments towards third parties. Credit risks are not concentrated in a particular counterparty. Although the company receives lines of credit from many input suppliers during the season, there is no line of credit secured in advance by the company because the Group manages its positions on a case by case basis.

3.7. Capital repatriation risks

Risks related to repatriation of capital come from the investments in its Ukrainian subsidiaries. To date, foreign groups are able to repatriate their capital through dividend payments or the repayment of shareholder loans without tax implications. AgroGeneration historically used to finance most of its investments in Ukraine via shareholder loans, normally through its Cypriot entities. The capital repatriation risks are linked to these investments. Possible changes in the political environment in Ukraine or in Cyprus could lead to restrictions on repatriation of capital invested in this country. Particularly, a number of temporary administrative restrictions on currency transactions and cross-border movement of capital were introduced by the National Bank of Ukraine (NBU) with the Russia Federation' full-scale military invasion of Ukraine in February 2022.

4. Critical accounting judgments and estimates

The preparation of Consolidated Financial Statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Consolidated Financial Statements are the following.

Estimates and judgments are continually evaluated on the basis of historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4.1. Impairment test on intangible assets

Intangible assets are tested for impairment at each balance sheet date and whenever there are indications of impairment. The outcome of this exercise is highly sensitive to certain assumptions (weighted average cost of capital, fluctuation of the commodities price, yields).

4.2. Fair value of biological assets and net realisable value of agricultural produce

The Group's biological assets are measured at fair value less costs to sell at each balance sheet date. The fair value of biological assets varies according to climatic conditions during crop development and harvest, yield potential and price development. A change in any of these estimates could lead to a material change in the income statement. If the management team's assumptions as of June 30, 2023, would have been by 10% better/lower, then the fair value of the biological assets and gross margin would increase/decrease by around € 1 179 k.

The agricultural produce harvested by the Group is first fair valued at the harvest date when accounted for in inventory in the "Agricultural produce". They are later revalued at the lower of that fair value and the net realizable value at the balance sheet date. The value used for agricultural produce in the assessment of fair value at harvest time and subsequently for the net realizable value at the balance sheet date is determined based on the actual prices less costs to sell at the point of harvest and contract prices on the presold crops.

4.3. Equity-settled share-based transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value requires determining the most appropriate valuation model for a grant of equity instruments, which is dependent on the terms and conditions of the grant. This also requires determining the most appropriate inputs to the valuation model including the expected life of the option, volatility and dividend yield and making assumptions about them.

4.4. Fair value of fixed assets

Starting from January 1, 2015 the Group applies revaluation model to its tangible assets located in Ukraine, such as buildings, constructions, machinery and equipment and other assets.

Under this model, property is carried at fair value less any subsequent accumulated depreciation and impairment losses. An impairment loss is recognized in the income statement, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Estimating the fair value of property requires the exercise of judgment and the use of assumptions. At each reporting date, the Group carries out a review of the macroeconomic factors such as, inflation rate in Ukraine and depreciation of UAH, to determine whether the carrying amount of tangible assets differs materially from fair value.

Based on the results of the review, the Group concluded that the carrying amount of building, constructions, machinery and equipment and other assets does not materially differ from the fair value as of June 30, 2023.

5. Summary of significant accounting policies

The principal accounting policies applied are summarized below.

5.1. Basis of preparation and changes in accounting policies

AgroGeneration's Consolidated Financial Statements are prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB) and as endorsed by the European Union (EU) as of June 30, 2023. They comprise (i) the IFRS, (ii) the International Accounting Standards (IAS) and (iii) the interpretations provided by the International Financial Reporting Interpretations Committee (IFRIC) or the former Standing Interpretations Committee (SIC).

The Group's Consolidated Financial Statements include the Financial Statements of AgroGeneration and those of all its subsidiaries as of June 30, 2023. The Financial Statements of the subsidiaries are prepared for the same accounting period as those of the parent company and are based on the same accounting policies.

The IFRS accounting policies used by AgroGeneration in the preparation of these Consolidated Financial Statements as of June 30, 2023 are the same as for 2022 ones presented, except for those pertaining to the effect of the new or amended standards or interpretations detailed below.

<u>Standards and amendments pronouncements in the European Union for financial period beginning on January 1, 2022</u>

- Amendments to IFRS 3 – Reference to the Conceptual Framework (applied for annual periods beginning on or after 1 January 2022).
- Amendments to IAS 16 – Property, Plant and Equipment: Proceeds before Intended Use (applied for annual periods beginning on or after 1 January 2022).
- Amendments to IAS 37 – Onerous Contracts – Costs of Fulfilling a Contract (applied for annual periods beginning on or after 1 January 2022).
- Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter (applied for annual periods beginning on or after 1 January 2022).
- Amendments to IFRS 9 Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities (applied for annual periods beginning on or after 1 January 2022).
- Amendment to IFRS 16 Leases – treatment of lease incentives (applied for annual periods beginning on or after 1 January 2022)
- Amendments to IAS 41 Agriculture – Taxation in fair value measurements (applied for annual periods beginning on or after 1 January 2022)
- Amendment to IFRS 16 Leases COVID-19-Related Rent Concessions (the amendment is effective 1 June 2020 but, to ensure the relief is available when needed most, lessees can apply the amendment immediately in any financial statements—interim or annual).
- Amendment to IFRS 16 - Covid-19-Related Rent Concessions beyond 30 June 2021 (applied for annual reporting periods beginning on or after 1 April 2021)

<u>Standards and amendments pronouncements in the European Union for financial period beginning on or after January 1, 2023</u>

<u>New or revised standards</u>

Endorsed by EU

- IFRS 17 – Insurance Contracts (effective for annual reporting periods beginning on or after 1 January 2023).

<u>Amendments to the standards</u>
Endorsed by EU

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 – Interest Rate Benchmark Reform – Phase 2 (applied for annual periods beginning on or after 1 January 2021).
- Amendments to IFRS 4 - Extension of the Temporary Exemption from Applying IFRS 9 (applied for annual periods beginning on or after 1 January 2023)
- Amendments to IAS 8 - Definition of Accounting Estimates (applied for annual reporting periods beginning on or after 1 January 2023)
- Amendments to IAS 12 - Deferred Tax related to Assets and Liabilities arising from a Single Transaction (applied for annual reporting periods beginning on or after 1 January 2023)

- Amendment to IFRS 17 - Initial Application of IFRS 17 and IFRS 9 — Comparative Information (applied for annual reporting periods beginning on or after 1 January 2023)
- Amendments to IFRS 16 - Lease Liability in a Sale and Leaseback (applied for annual reporting periods beginning on or after 1 January 2024)
- Amendments to IAS 1 - Non-current Liabilities with Covenants (applied for annual reporting periods beginning on or after 1 January 2024)

Not yet endorsed by EU

- Amendments to IAS 1 – Classification of Liabilities as Current or Non-current (applied for annual periods beginning on or after 1 January 2024)
- Amendments to IAS 1 and IFRS Practice Statement 2 - Disclosure of Accounting Policies (applied for annual reporting periods beginning on or after 1 January 2023). *Endorsed for use in the EU, however, as practice statements are not endorsed for application in the EU, the amendments to IFRS Practice Statement 2 have not been endorsed.*

These standards did not have and are not expected to have material effect on the Group's financial statements.

In 2021, the Group has changed its accounting policy for finance lease liabilities and correspondent right-of-use assets in accordance with IFRS 16. This modification provides to include the full actual land lease payment, as opposed to contractual only, to the measurement of right-of-use assets and lease liabilities. Please refer for more details to the Note 5 of the Consolidated Financial Statements 2021.

5.2. Consolidation

(a) Subsidiaries

All the subsidiaries in which the Group exercises control are fully consolidated. Control exists when all the following conditions are met:

- power over the subsidiary;
- exposure, or rights, to variable returns from its involvement with the subsidiary;
- the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. The Group does not exert joint control over any of the entities within its scope of consolidation as at June 30, 2023.

All intercompany balances and transactions as well as income, expenses and unrealised gain/losses, which are included in the net book value of assets, which derive from intercompany transactions, are fully eliminated.

(b) Accounting for business combinations

The acquisitions of subsidiaries from third parties (which constitute Business Combination under IFRS) are accounted for using the acquisition method. On acquisition, the assets, liabilities and contingent liabilities of a subsidiary are measured at fair values.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquired subsidiary, and the fair value of the Group's previously held equity interest in the acquired subsidiary (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities and contingent liabilities assumed.

In case identifiable net assets attributable to the Group, after reassessment, exceed the cost of acquisition, the difference is recognized in the Consolidated Income Statement as a bargain purchase gain.

5.3. Foreign currency translation

(a) Functional and presentation currency

Items included in the Financial Statements of each Group entity are measured using the currency of primary economic environment in which the entity operates ("the functional currency").

The functional currency of the parent and Cypriote subsidiaries is the euro (EUR) and the functional currency of Ukrainian subsidiaries is the hryvnia (UAH).

The presentation currency of the Consolidated Financial Statements is the euro (EUR).

(b) Foreign transactions

Foreign currency transactions are translated into the respective functional currencies using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised as financial income and expense in the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.

Long-term intercompany loans to a foreign operation for which settlement is neither planned nor likely to occur in the foreseeable future are classified as net investments in the foreign operation.

Where a subsidiary that is a foreign operation repays a net investment loan but there is no change in the parent's proportionate percentage shareholding, cumulative translation adjustment is not reclassified from other comprehensive income to the income statement.

(c) Translation of Financial Statements expressed in foreign currencies

The income statements and statements of financial position of all Group entities that have a functional currency different from the presentation currency (none having a currency of a hyperinflationary economy as of June 30, 2023) are translated into the presentation currency as follows:

- Assets and liabilities of the statement of financial position are translated at the exchange rate of closing date,
- Revenues and charges in the income statement are translated at exchange rates at the dates of the transactions (for practical reasons, the Group translates items of income and expenses for each period presented in the financial statements using the average exchange rates for such an accounting period, if such translations reasonably approximate the results translated at exchange rates prevailing on the dates of the transactions),
- Residual foreign exchange differences are recognized in a separate component of equity.

The exchange rates used for translating Financial Statements of subsidiaries in Ukraine are the following:

	June 30, 2023		December 31, 2022		June 30, 2022	
Monetary unit per € 1	**Average**	**Closing**	**Average**	**Closing**	**Average**	**Closing**
Ukrainian Hryvnia (UAH)	39,52	40,00	34,00	38,95	31,74	30,78
American Dollar (USD)	1,08	1,09	1,05	1,07	1,10	1,05

The rates used for the hryvnia and the U.S. dollar are those of the National Bank of Ukraine ("NBU") in force.

Exchange rate differences on a monetary item forming part of the net investment of the entity presenting the Financial Statements in a foreign operation are recognised in other comprehensive income and reclassified from equity to Income Statement upon partial or total disposal of this net investment.

Goodwill and fair value adjustments recognised in the acquisition of a foreign entity are recognised as assets and liabilities of the foreign entity and translated at closing exchange rate.

5.4. Intangible assets

The main intangible assets recognised are goodwill and leasehold rights. These have been recognised as part of the business combination process.

Subsequent to initial recognition goodwill is recognized at initial cost less accumulated impairment losses, if any.

Cash-generating unit (CGU) for the goodwill impairment test was determined to be equal to the operating segment "Ukraine".

Where goodwill forms part of a CGU and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

5.5. Property, plant and equipment

Starting from January 1, 2015 the Group applies revaluation model for fixed assets located in Ukraine. Under this model, fixed assets are carried at fair value less any subsequent accumulated depreciation and impairment losses.

Revaluation is made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the date of reporting period.

The acquisition cost of the tangible fixed assets includes all the expenses directly attributable to the acquisition of the fixed assets. Subsequently capitalized costs include major expenditures for improvements and replacements that extend the useful lives of the assets or increase their revenue generating capacity. All other repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred. The carrying amount of the replaced limited-life component is derecognised.

Fixed assets are depreciated over their estimated useful lives:

- Buildings 10 – 55 years
- Machinery and equipment 5 – 30 years
- Other tangible assets 3 - 30 years

Production facilities represent immobile agricultural production equipment, mainly dryers and cleaners. Machinery and vehicles include other mobile agricultural equipment (tractors, combines, harvesters, seed planters, trucks etc.).

The assets' useful lives are reviewed, and adjusted if appropriate, at each financial year-end. The effect of any changes from previous estimates is accounted for prospectively as a change in an accounting estimate.

The gain or loss arising on a sale or disposal of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the income statement.

Construction in progress comprises costs directly related to the construction of property, plant and equipment including an appropriate allocation of directly attributable variable overheads that are incurred in construction. Construction in progress is not depreciated. Depreciation of construction in progress commences when the assets are available for use, i.e. when they are in the location and condition necessary for them to be capable of operating in the manner intended by the management.

On the subsequent sale or retirement of revalued assets, the revaluation surplus remaining in the revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognized.

5.6. Impairment of non-financial assets

Non-financial assets other than goodwill are reviewed for possible impairment at each reporting date and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss is recognized immediately in the Consolidated Income Statement unless the relevant asset is carried at revalued amount, in which case the impairment loss is treated as a revaluation decrease.

5.7. Agriculture

(a) Definitions

The Group accounting policies for agricultural activities are based on IAS 41 "Agriculture".

Agricultural activity is defined as a biological transformation of biological assets into agricultural products or into other biological assets.

Group classifies following biological assets: crops in field

Agricultural produce are the products of the harvest of biological assets of the Group and produce received from cattle breeding, i.e. harvested grain that is stored, milk, meat and other livestock produce.

The Group recognizes a biological asset or an agricultural produce when the Group controls the asset as a result of past events, and it is probable that future economic benefits associated with the asset will flow to the Group, and the fair value or cost of the asset can be measured reliably.

(b) Biological assets

Biological assets are measured at initial recognition and at each balance sheet date at their fair value less costs to sell, with any resulting gain or loss recognized in the income statement. Costs to sell include all costs that would be necessary to sell the assets, including costs necessary to get the assets to market.

Biological assets are measured using the present value of expected net cash flows from the sale of an asset discounted at a current market determined rate. The objective of a calculation of the present value of expected net cash flows is to determine the fair value of a biological asset. The difference between fair value less costs to sell and total production costs is allocated to biological assets held in stock as of each reporting date as a fair value adjustment.

Based on the above policy, the principal groups of biological assets are stated as follows:

(i) *Crops in fields*

The fair value of crops in fields is determined by reference to the discounted cash flows that will be obtained from sales of harvested crops, with an allowance for costs to be incurred and risks to be faced during the remaining transformation process.

The fair value of plant-growing Biological assets is determined based on, among other estimates, weather conditions, quality of soils, growth potential, yields, harvest conditions and price development.

As of June 30, 2023, the Group had identified for each type of plant growing biological asset their respective principle market, and measures their fair value based on the following:

in determining prices

- Management assessment of future prices at the date of harvest reconciled to the Ukrainian FOB prices or Western markets offset prices on the balance sheet date. These prices have been reduced by fobbing and transport costs.

in determining yields

- Management assessment of future yields for crop based on the most relevant recent data from the crop surveys carried out in the fields.

Given the nature of these input parameters, the fair value of the biological assets is categorised as Level 3 as defined by IFRS 13. Change in any estimates could lead to recognition of significant fair values changes in income statement.

(c) Agricultural produce

Agricultural produce harvested by the Group is initially measured at the time of harvest at its fair value less cost to sell at the point of harvest. It is subsequently recorded as inventory in “Agricultural produce” and stated at the lower of fair value at the time of harvest and net realizable value. This valuation at net realizable value is presented in the form of inventory depreciation. ("Change in fair value of finished goods", cf. Note 11).

The value of agricultural produce used for the assessment of fair value at the time of harvest and subsequent net realizable value is determined based on the actual prices less costs to sell at the point of harvest and contract prices on the presold crops.

(d) Work in progress (inventory of work in progress)

Work in progress is represented by the costs of preparing the land which has not been sown at balance sheet date (case of spring plants in Ukraine – corn, soybean, sunflower, etc. – when valued as of December 31). The soil preparation costs are measured on the basis of the historical costs incurred by the Group.

5.8. Leases, Right-of-use assets and lease liabilities

Leases are recognized, measured and presented in line with IFRS 16 *Leases.* The Group recognizes a right-of-use assets and a lease liability at the commencement date of the contract for all leases conveying the right to control the use of an identified assets for a period of time.

The right-of-use asset is depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use assets is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability if initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments,
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under the purchase option that the Group is reasonably certain to exercise, lease payment in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases (leases with lease term of 12 months or less, without any purchase option). The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Amounts recognized in profit or loss

(in thousands of Euros)	first half 2023
Interest on lease liabilities	717
Additional lease payments not contractual and not included in the measurement of lease liabilities*	-
Income from sub-leasing right-of-use assets	29
Expenses relating to short-term leases	12

*Estimation of Lease liabilities for right-of-use assets was based on contractual terms until 2020 inclusive. However, majority of land lease agreements were concluded away back that caused a lag between contractual terms and current market conditions. Actual payments to landholders are higher than those stipulated in the contracts. That additional component is attributable to market growing tendency. Beginning January 1, 2021 the Group has changed its accounting policy to estimate lease liabilities based on actual payment terms substantiating that the full payment is constitutes irrevocable liability within the meaning of IFRS 16. As such, additional lease payments are included in the measurement of the lease liabilities within the scope of IFRS 16 Leases. Please refer for more details to the Note 5 of the Consolidated Financial Statements 2021.

Amounts recognized in the statement of cash flows

(in thousands of Euros)	first half 2023
Total cash outflow for leases	533

5.9. Government grants

An unconditional government grant is recognised as income when the government grant becomes receivable.

If a government grant is conditional, the Group recognises the government grant as income when the conditions attaching to the government grant are met (area-aid environmental subsidies) and until then aid received is recognised as a liability.

5.10. Inventories

(a) *Raw material and other supplies*

Inventories are stated at the lower of cost and net realizable value. Costs comprise raw materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present locations and condition.

Cost is calculated using the weighted average cost method. Net realizable value is determined as the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

(b) *Finished goods (agricultural produce)*

Cf. note 5.7 (c) – Agriculture.

(c) *Work in progress*

Cf. note 5.7 (d) – Agriculture.

5.11. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or to the exercise of new options are recorded directly in equity as a deduction from the issue premium, net of tax effects.

5.12. Current and deferred income tax

(a) *General tax treatment*

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group's subsidiaries operate and generate taxable income.

The tax rates applicable on June 30, 2023 are 25% in France, 18% in Ukraine (see (b) Agricultural tax schemes for agricultural concerns in Ukraine) and 12,5% in Cyprus.

Tax reform measures in France (2016) already provided for a progressive reduction of the ordinary corporate tax rate from 33,33% to 28%. The Finance Law for 2018 provides for a further progressive reduction of the corporate income tax rate to 25%, fully applicable for financial years opened in 2023. The schedule for phased-in application of the progressive reduction was as follows:

- For financial years opened as from 1 January 2020, the 28% rate of corporate income tax has become the new "ordinary rate" (for all profits).
- For financial years opened as from 1 January 2021, the ordinary rate of corporate income tax has been reduced to 26.5%.
- For financial years opened as from 1 January 2022, the ordinary rate of corporate income tax has been reduced to 25%.

The deferred tax is determined using the tax rate and the tax regulations in effect or in effect in essence at the balance sheet date and which are likely to be applied when the deferred tax assets will be used or when the deferred tax liability will be paid.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the consolidated financial statements and the corresponding tax basis used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized.

However, the deferred tax is not accounted for if at initial recognition of an asset or a liability at the time of a transaction other than a business combination the transaction has no implications for the accounting income or the taxable income.

Deferred tax is charged or credited to the income statement, except when it relates to items credited or charged directly to equity, in which case the deferred tax is also dealt with in equity.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when:

- The Group has a legally enforceable right to set off the recognized amounts of current tax assets and current tax liabilities;
- The Group has an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously;
- The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority in each future period in which significant amounts of deferred tax liabilities and assets are expected to be settled or recovered.

(b) Agricultural tax scheme for agricultural companies in Ukraine

In Ukraine, a company is considered to be a farming company if at least 75% of its revenues from the previous fiscal year arise from the sale of agricultural products. In this case, a farming company enjoys special regime on corporate income tax.

Starting from January 1, 2017, the privileged VAT regime for agricultural companies has been cancelled. For more detailed refer to the Consolidated Financial Statements as of December 31, 2016.

Corporate income tax: agricultural companies are not subject to corporate income tax but to the tax on land which is calculated on the basis of a percentage of the value of the land used for agricultural production. The related corresponding costs are classified in "Cost of sales".

Among the 7 legal entities that the Group controls in Ukraine as of June 30, 2023, 4 are involved in agricultural production and are eligible for the special tax regime for agricultural companies in Ukraine in 2023.

5.13. Employees benefits

(a) Pension obligations

The Group does not operate any significant pension schemes. The contributions to the local pension funds are treated as defined contribution benefits.

(b) Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after the balance sheet date are discounted to present value.

5.14. Provisions

Provisions must be recognized when the Company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are not recognised for future operating losses.

5.15. Revenue

Revenue represents the proceeds from ordinary business activities. These proceeds are measured at fair value of the counterparty received or to be received for the sale of goods or services in the scope of the Group's typical operations.

The proceeds from typical operations presented for the Group's Ukrainian activities exclude the VAT collection on sales.

These same proceeds from agricultural operations are presented net of discounts and rebates, and after elimination of intra-Group sales.

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured.
The following specific recognition criteria must also be met before revenue is recognized:

- Sale of Goods and Finished Products – Revenue is recognized when the significant risks and rewards of ownership of goods for resale and finished products have passed to the buyer, the amount of revenue can be measured reliably and the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold. The point of transfer of risk, which may occur at delivery or shipment, varies for contracts with different types of customers.
- Rendering of Services – Revenue is recognized in the accounting period in which services are rendered.

The Group's main revenue arises from the sales of agricultural produce.

5.16. Share-based payment

The fair value of services assumed to have been received in exchange for the equity instruments (warrants) issued is recognised as an expense in the income statement and in other reserves in equity during the vesting period (from the grant date of warrants until the vesting date). The fair value of the services received is determined by reference to the fair value (market value) of equity instruments granted at the grant date.

6. Segment reporting

During first half 2023, the Group continued to operate segment in Ukraine, which was composed of 7 legal entities operating around 30 000 hectares of farmland, as was defined in late 2022 after forced reduction of scope due to the war hostilities. (ref. Note 5 of the Consolidated Financial Statements as of and for the year ended December 31, 2022).

Total	**1 893**	**(94)**	**-**	**1 799**	**11 838**	**(83)**	**(341)**	**11 414**

Raw materials and other supplies are inputs to be used in the agricultural campaign 2023/2024, including purchased seeds, fertilizers, fuel, spare parts and other suppliers. ***Work in progress*** includes costs accumulated before crop sowing.

As of June 30, 2023, ***agricultural produce*** representing €552k, is substantially made up of 6 739 tons of crops mainly from the 2022 harvest (53 710 tons as of December 31, 2022) (cf. Note 12 Biological assets).

Depreciation represents write-down provisions of inventory to the net realizable value at the reporting date.

Part of raw materials and agricultural produce – crop stocks - have been impaired during 2022 in connection with hostilities and recognised within 2022 losses in the Statement of Income (ref. Note 23 as well as Notes 2.1, 5 of the Consolidated Financial Statements as of and for the year ended December 31, 2022).

12. Biological assets

(in thousands of Euros)	**June 30, 2023**			**December 31, 2022**		
	Biological assets at cost	*Adjustment to fair value*	***Fair value***	*Biological assets at cost*	*Adjustment to fair value*	***Fair value***
Current						
Crops in fields	13 240	(4 140)	9 100	725	1 054	1 779
Livestock	-	-	-	9	-	9
Total current biological assets	**13 240**	**(4 140)**	**9 100**	**734**	**1 054**	**1 788**

The Group's biological assets are crops that are planted as of June 30, 2023 for harvest in the second half of 2023 in Ukraine.

The biological assets of the Group are measured at fair value less estimated costs to sell and are within level 3 of the fair value hierarchy (for more details refer to Note 5.7). At the balance sheet date, the fair value of **the current crops in fields** is determined on the basis of the planted area and the following significant unobservable inputs as of June 30, 2023:

- Crops price
- Crops yields (tonnes per hectare)
- Expected production costs

	June 30, 2023				**December 31, 2022**			
	Cultivated area (in hectares)	*Average yields (ton / ha)*	*Average price (EURO/ton)*	*Fair value (in kEURO)*	*Cultivated area (in hectares)*	*Average yields (ton / ha)*	*Average price (EURO/ton)*	*Fair value (in kEURO)*
Winter Wheat	5 933	3,9	96	1 763	5 933	4,1	157	1 779
Sunflower	22 029	2,0	235	6 870				
Corn	574	5,5	99	163				
Soy	1 061	1,6	285	304				
Pea	25	2,2	27	-				
TOTAL	**29 622**			**9 100**	**5 933**			**1 779**

If the management team's assumptions as of June 30, 2023, would have been different by 10% better/lower, then the fair value of the biological assets and gross margin would increase/decrease by around € 1 179 k.

The following table represents movements in biological assets for the year ended December 31, 2022 and six months ended June 30, 2023:

(in thousands of Euros)	Crops	Livestock	TOTAL
Book value as of December 31, 2021 ***as restated***	**12 326**	**14**	**12 340**
Current Biological Assets	12 326	14	12 340
Non-current Biological Assets	-	-	-

Gain/loss due to change in fair value	**(5 250)**	-	**(5 250)**
Impairment of WIP / BA as the result of war	-	-	-
Exchange rate differences	217	-	217
Book value as of June 30, 2023	**9 100**	**-**	**9 100**
Current Biological Assets	9 100	-	9 100
Non-current Biological Assets	-	-	-

(1) Costs incurred to the part of land areas as of early invasion hostilities period in 2022 have been impaired and recognised within 2022 losses. This impairment - write-off of costs incurred to both work in progress and bio-logical assets, i.e. sown in late 2021, but not harvested, - reflects induced significant reduction in operated land bank from around 56,000 to 30,000 hectares (ref. Note 23 as well as Notes 2.1, 5 of the Consolidated Financial Statements as of and for the year ended December 31, 2022).

13. Trade and other receivables

(1) Current and non-current lease payments are presented at the present value of the future minimum lease payments. The Lease liabilities for the right of use assets for the land, mainly represented by agricultural land, combine liabilities for the whole scope of lands (around 30,000 ha) in operations and for which the land lease agreements have been legally in action as of June 30, 2023.

(2) The Group hasn't attracted bank borrowings since the end of 2021.

(3) Other financial debt relates to the borrowings from related party Konkur (€6.3m).

The maturity of the current and non-current borrowings is as follows:

(in thousands of Euros)	**2023**	**2024**	**2025**	**Total**
Financial lease	350	150	135	635
Bank borrowings	-	-	-	-
Other financial debt	6 322	-	-	6 322
Total borrowings	**6 672**	**150**	**135**	**6 957**

Details of the variable-rate and fixed-rate borrowings and lease liabilities for right-of-use assets (excluding interest):

(in thousands of euros)	**June 30, 2023** Variable	Fixed	**December 31, 2022** Variable	Fixed
Bank borrowings	-	-	-	-
Financial lease	635	-	853	-
Lease liabilities for right-of-use assets	-	11 346	-	10 386
Other financial debt	-	6 322	-	6 493
Total borrowings	**635**	**17 668**	**853**	**16 879**

The carrying amounts of the Group's borrowings and lease liabilities for right-of-use assets are denominated in the following currencies:

(in thousands of Euros)	June 30, 2023	December 31, 2022
Currency:		
EUR	-	-
USD	6 957	7 346
UAH	12 221	10 719
Total borrowings	**19 178**	**18 065**

Reconciliation of movements of borrowings and lease liabilities for right-of-use assets to cash flows arising from financing activities:

(in thousands of Euros)	Finance leases	IFRS 16 debts	Bank Borrowings and other financial debts	Total
Balance as of December 31, 2022	**853**	**10 719**	**6 493**	**18 065**
Proceeds from borrowings	-	-	-	**-**
Repayment of borrowings	(198)	-	-	**(198)**

20. Revenues from operating activities

(in thousands of Euros)	first half 2023	first half 2022
Sales of agricultural produce (1)	8 516	16 057
Services and others (2)	124	321
Total revenue from operating activities	**8 640**	**16 378**

(1) In first half 2023, AgroGeneration sold 35 993 tons of cereals and oilseeds.
(2) The services are mainly composed of activities of drying, storage or loading grain for third parties.

Detail of revenue by geographical region:

(in thousands of euros)	first half 2023	first half 2022
Ukraine	8 443	16 378
France	197	-
Total revenue	**8 640**	**16 378**

Detail of revenue by harvest:

(in thousands of Euros)	first half 2023	first half 2022
Crops revenue	**8 516**	**16 057**
Harvest 2021		16 057
Harvest 2022	8 516	
Services & Other	**124**	**321**
Total Revenue	**8 640**	**16 378**

There are three significant clients to which the Group sold the goods for €4,8m in first half 2023 which represent 56% of the total revenue. The revenue from other clients is individually less than 10%.

21. Functional costs / costs by nature

(in thousands of Euros)	first half 2023	first half 2022
Cost of sales	(6 340)	(15 501)
Administrative & Selling expenses	(1 681)	(2 223)
Costs by function	**(8 021)**	**(17 724)**
Raw materials, purchases services and leasing	(5 477)	(6 844)
Personnel costs	(983)	(1 624)
Depreciation	(1 934)	(1 898)
Fair value and impairment adjustment (for goods sold)	378	(7 315)
Other expenses	(5)	(43)
Costs by nature	**(8 021)**	**(17 724)**

On average, in the first half 2023 the Group had 464 employees.

22. Other income and expense

(in thousands of Euros)	first half 2023	first half 2022
Proceeds from fixed assets sold	49	47
Other income	57	195
Other operating Income	**106**	**242**
Net book value of fixed assets sold	(67)	(44)
Allowance for bad debts	(11)	-
Charity and related expenses	(85)	-
Other expenses	(118)	(180)
Other operating expenses	**(281)**	**(224)**
Other operating income / (expenses), net	**(175)**	**18**

23. Losses and expenses incurred as the result of war hostilities in 2022

Following the full scale invasion of the Russian troops to Ukraine, temporary occupation of large scale of the Group's operated locations (Note 2.1), the Group has incurred significant losses. These losses combine both material damages and losses, as well as critical negative overall effects undermining future operations (such as decrease of crop prices, increase of raw materials prices, disruption of supply channels, aggravating logistic etc.). Consequent material losses and costs incurred as the result of hostilities recognized as of June 30, 2022, are disclosed below:

Losses and expenses incurred as the result of war hostilities
(in thousands of euros)

	first half 2022
Crop stocks losses	1 969
Impairment of crop stocks available as of June 30, 2022	919
Raw materials losses	690
Work in progress losses	7 647
Property, Plant, Equipment and intangible assets losses	4 957
Charitable expenses aimed on assistance to the Armed Forces of Ukraine and suffered population	866
Losses and expenses incurred as the result of war	**17 048**

Subsequently, upon completion by the end of 2022 of partial assets liquidation, the finalized net losses, excluding impairment of crop stocks, subsequently sold, and including liquidation costs have been recognized in the Income Statement for the year ended December 31, 2022, in the following amount (please see Note 5 of the Consolidated Financial Statements as of and for the year ended December 31, 2022):

Losses, expenses and other effects as the result of war (in thousands of euros)	**2022**
Direct material losses and costs caused by war (fixed assets, bio-assets and work in progress, inventory stocks, charity)	(15 528)
Costs incurred on the liquidation procedure	(1 130)
Total losses and costs incurred in 2022 as the result of war	**(16 658)**
Less positive effect of reduction of the Right of Use Land Liabilities, net	1 210
Net loss on the war damages and resulting de-recognition	**(15 448)**

24. Net financial income / (expenses)

(in thousands of Euros)		first half 2023	first half 2022
Cost of debt	(1)	(58)	(437)
Foreign exchange gains and losses		(166)	494
realised foreign exchange gains/(losses)	(2)	*36*	*631*
unrealised foreign exchange gains/(losses)	(3)	*(202)*	*(137)*
Other		(750)	(1 488)
Net financial expense		**(974)**	**(1 431)**

Interest expense
Cost of debt is composed of interest on leasing.

Foreign exchange gains and losses
The Group's foreign currency denominated monetary assets and liabilities as of June 30, 2023 consist of USD and EURO denominated loans and other debts. Other monetary assets and liabilities are not significant.

Due to the impact of the current political and military situation on the volatility of Ukrainian hryvnia (cf. Note 3.3), the exchange rate Ukrainian hryvnia/USD has been fixed by the NBU during the first half 2023 at 36,57 UAH/USD.

(2) Realised foreign exchange gains and losses (net amount € 36k gain) generated by the Group in first half 2023 occurred on other transactions.

(3) Unrealised foreign exchange gains and losses generated by the Group in first half 2023 due to the translation of all monetary items of Ukrainian entities and holding companies (mostly intercompany loans) from foreign currency (mostly USD) into functional currency (UAH and EUR respectively). Unrealised foreign exchange net loss generated included:

- €80k gain mostly related to other debt;
- €282k loss related to the inter-company loans, interest on loans and other ICO debt between Ukrainian, Cyprus and French entities.

Other financial income/(expenses) in first half 2023 includes € 717k of the interest expenses related to the IFRS 16 standard (€1 630 k in first half 2022)

25. Earnings per share

The basic earnings per share are calculated by dividing:

- The net earnings (group share)
- By the weighted average number of ordinary shares in circulation during the financial year.

The diluted earnings per share are calculated by dividing:

- The net earnings (group share) taking into account the instruments that cause dilution,
- By the weighted average number of ordinary shares in circulation during the financial year plus the weighted average number of ordinary shares that would have been issued following the conversion of all the potential ordinary shares that cause dilution into ordinary shares.

(in thousands of Euros)	**first half 2023**	**first half 2022**
Net consolidated income / (loss) - group from continued activity (K€)	(5 780)	(27 192)
Net consolidated income / (loss) - group from discontinued activity (K€)	-	-
Net consolidated income / (loss) - group share (K€)	**(5 780)**	**(27 192)**
Dilution impact (K€)	-	-
Net consolidated income / (loss) after dilution impact	**(5 780)**	**(27 192)**
Weighted average number of ordinary shares	221 586 387	221 586 387
Potential dilution	-	-
Weighted average number of shares after dilution impact	221 586 387	221 586 387
Net income / (loss) per share (Euros) - group share	**(0,03)**	**(0,12)**
Net income / (loss) per share (Euros) after dilution - group share	**(0,03)**	**(0,12)**
Net income/(loss) per share (Euro)	**(0,03)**	**(0,12)**
Net income/(loss) per share (Euro) after dilution	**(0,03)**	**(0,12)**

Over the first half 2023, the potential ordinary shares that would have been issued after the conversion of the stock-options, warrants or BSPCE are not included in the measurement, since they have an anti-dilutive effect.

26. Transactions with related parties

Material transactions entered into over the period and remaining balances as at June 30, 2023 with parties that have significant influence over the Group are as follows:

(in thousands of Euros)	June 30, 2023		first half 2023		December 31, 2022		first half 2022	
	ASSETS	LIABILITIES	INCOME	EXPENSE	ASSETS	LIABILITIES	INCOME	EXPENSE
